RE: LSS-75

1. Reference of outstanding value. Evaluation of A-374's material being specifically sought (?) for your guidance in his future exploitation. ✓

2. Please cable whether A-374 is serving others with this or any material beside us. If not or if he can be definitely pre-empted by us, no effort should be spared to achieve same.

3. Matter of LSS-75 caliber should go to Washington ONLY, for security reasons, as should all ROMONA material, less hot info should be sent also to other field stations when content directly concerns their area.

389.
